

Accufy Update Instructions

Important Before applying the update v 2.7 make sure you are using v 2.6 (You can check the current version to login your admin panel > left sidebar), If you are using an older version please contact our support to get the previous versions.

Step 1: Download the latest **Accufy** script and extract it on your pc. Open updates > update_v2.6_v2.7 > uploads folder there you will see 2 zip files in this folder and you need to upload those files on your server please follow the directions below.

- **application.zip** > upload path: Goto your **project root folder > application >** upload this zip file and extract it inside this folder.
- **assets.zip** > upload path: Goto your **project root folder > assets >** upload this zip file and extract it inside this folder.

Step 2: Upload “updates” folder in your project root folder

Step 3 Open a browser and write a url like this:

www.yourdomain.com/updates/update_v2.6_v2.7 you will see a page like below here enter your item purchase code for update this script.
